

What is BSeal?

BSeal is a revolutionary new bag clip that provides a water and air tight seal for your chips, fruit, meat, vegetables, and more! Made of a food safe plastic right here in the USA, BSeals utilize clip sticks technology, meaning you can just snap both rods together for an instant seal!

Can I Cut it?

Yes - Part of what makes BSeals so great is that they can be cut to any size for nearly any bag. Just grab a regular pair of scissors and snip away!

Can I Clean it?

Yes - Another great feature of BSeals is that not only are they easily washed with basic dishwasher soap, they are completely dishwasher safe.

Can I Store it?

Yes - BSeals can be stored anywhere you want them to be. BSeals are made of food safe plastic and will not mold or fall apart!

How does BSeal work?

BSeals come in two pieces: A long, hollow insert piece (shaped like a drinking straw), & a slightly shorter receiver piece (shaped like a letter U).

Place the receiver under the opening to your bag with enough extra room so that the opening is at least an inch above the receiver.

Then, place the insert into the receiver with the bag inbetween (as seen left), creating an air-tight seal for your food!

Do BSeals come in different styles?

All BSeals are made of the same food-safe plastic and retain their iconic shape. Additionally, all BSeals start at 12" long with the ability to be cut to any size you want! Available in packs of 4, 8, or 12, BSeals are available in a variety of colors including:

- Deep Pumpkin
- Pine Forest
- Peach
- Iceberg
- Light Mint
- Lilac
